## Sterilized Bacteria & Anti Odor

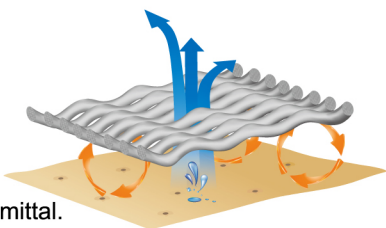

We adopt the best sterilized, anti- fungus fiber density knitted in the part of the feet which sweat most easily. It provides your feet with excellent protection.

## Absorbing & Sweat emitting

Using material with ingenious conception and design, we knit wicking fiber in the inner layer of socks. It forms protection layer of single transmittal.

It transforms sweat to high absorbing wet cotton layer and then transpires, that makes skin of feet Ventilated. Because of the material which is of anti-water properties, it doesn't make sweat stay in the fiber to inhibit nutrition supplies and makes bacteria unable to breed. That reaches Ventilating and Sterilized purposes for wearers.

## Non-binding

With strictly art design, we experience different wearing requests in different occasions. Follow ergonomics of body feet, with requests of seamless in the toes and non-binding in the cuff, we adopt exclusive guiding elastic knitted method to assure that your feet are in non-binding and comfortable feel.

## Sustained Performance

From after-process material, it provides function of absorbing and sweat emitting in fiber manufacture process to make socks keep sustained performance after being washed many times.

- Sterilized and anti odor fiber of this series is using natural cotton and Acrylate blending material to proceed in high-tech technology to make fiber with recovery functions..
- All series adopt skin touch material, not chemical liquid material. No side effects to human..

---

### Washing Instruction

---

1. Water temperature should be under 86°F.
2. Use mild washing liquid to wash it.
3. No bleach and fabric softener.
4. Do not tumble dry and iron.
5. Do not wring in force to lest break fiber.
6. Do not expose under the sun to extend the lifetime of fiber.
7. Do not store socks in the ball shape lest socks elastic fatigue.

---

### Recovery method of Ventilated socks

---

After a period of use of the socks, once their anti-odor effect decreased, please adopt following methods to recover its original function:

1. Use 500ml water of 104°F~122°F, and mix with 40ml vinegar, and put the pair of socks in. (Socks need to be cleaned up before putting them into vinegar lest stain permeate into fabrics.)
2. Soak socks into the water and take them out after 30 minutes, and wash them by clean water, after drying them up, they will recover to original function.

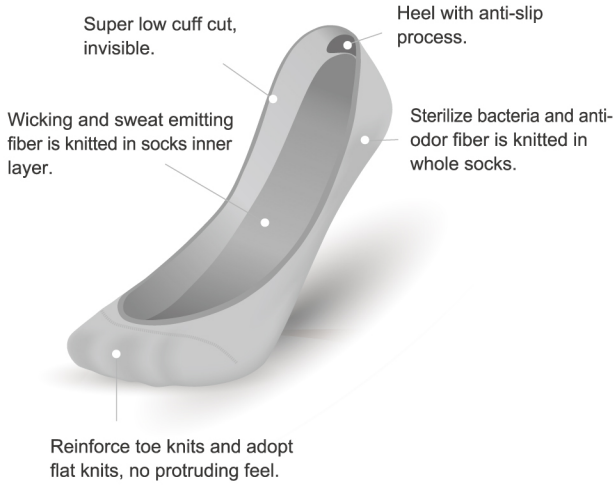

PS. Vinegar can be repeatedly used in 3~4 times and its temperature has to be increased to 104°F~122°F.

---

### SOCK SIZE TABLE

---

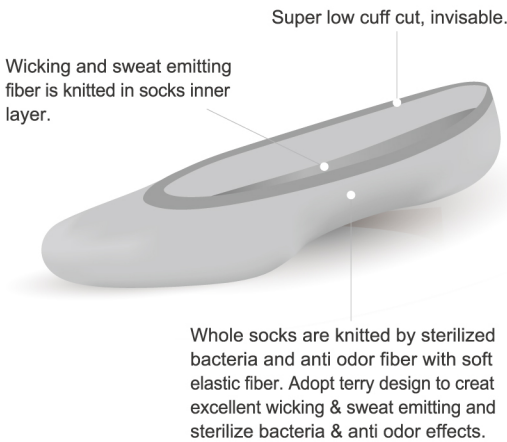

CM	EUR	UK	USA	SOCK SIZE
14-18				4-7 years old
18-21				8-12 years old
21.5-24	35-39	3-5.5	4-6.5	S
24.5-27	40-43	6-8.5	7-9.5	M
